FABRIC DIE-CUTTING TIPS

1. For the most accurate cuts, be sure you're cutting with the lengthwise grain (straight of grain) as the fabric goes through the cutter.
2. Use the GO! Fabric Reference Chart below as a guide to pre-cut width of fabric strips.
3. Layer or fanfold strips on the die up to four layers at a time for 100% cotton quilting fabric.
4. Position fabric on die just over shape you want to cut, following the angle of the shape. **Two Tone™ Foam** makes it easy to align fabric just over the edge of the shape so you can save fabric.

- Lay fabric and cutting mats on top of dies, place dies side by side, and move through the cutter.
