

# DIRECTIONS

Helpful Hint: Tilt rotary cutter blade at a slight angle when placing into teardrop shape for easy insertion.

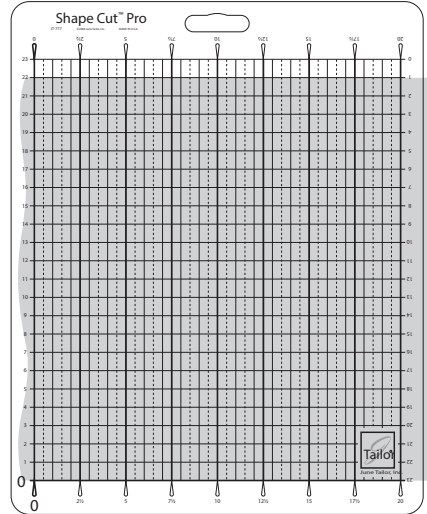

## To Cut Strips:

1. Fold fabric selvage to selvage.
2. Lay Shape Cut™ Pro on fabric with raw edges extending slightly beyond vertical slot marked “0” and bottom fold of fabric at horizontal line marked “0”.
3. Square up left edge of fabric by inserting blade of cutter in slot marked “0” and cut.
4. Cut subsequent strips to desired widths.

## To Create Jelly Rolls:

1. Fold fabrics selvage to selvage. Layer up to 4 different fabrics.
2. Square up fabric and cut strips per instructions for cutting 2-1/2” strips.
3. Lift ruler and stack desired number of strip sets on top of each other, aligning folds and raw side edges.
4. Beginning with selvage edges, roll strip stack to create “Jelly Roll”.

TIP: For best results, lift stack of strips off work surface and allow to hang off edge of table once the roll has been started.

## To Cut Squares:

1. Cut strips to desired width following previous instructions.
2. Keeping cut strips intact, lift Shape Cut™ Pro and turn 90°. Make sure fabric extends beyond vertical 0 and 20 slots and is aligned with bottom “0” marking.
3. Cut desired width in opposite direction.
