

GO! BIG[®] EASY AS...

Congratulations on purchasing your new GO! Big[®] Die Catcher. It's specially designed to work with the GO! Big Electric Cutter to easily catch your GO! Dies as they run through the cutter. Here are some helpful hints and steps to get the most out of your GO! fabric cutting system.

learn more at accuquilt.com/gobig

1. Setup.

Place the Die Catcher next to the GO! Big cutter. Slide the built-in metal foot beneath the GO! Big for a secure fit, providing support for the dies. Align the side edge of the cutter with the side edge of the Die Catcher.

2. Store.

Open the lid, and neatly place the power adapter inside the base, allowing either end of the power cable to pass through the designated keyholes. Close the lid. The spacious base accommodates the power adapter and cord, serving as a convenient storage solution when the cutter is not in use.

3. Done!

You're all set! Now, you can enjoy cutting fabric with your GO! Big Electric Fabric Cutter. Enjoy the accuracy and efficiency of your cutting system!

SAY GOODBYE TO CATCHING DIES BY HAND!

@accuquilt®

COMPATIBLE

GO! Big Die Catcher works with all GO! die sizes, including the GO! Big and GO! Strip Cutter dies. It provides support for dies, even when extended beyond the edge of the Die Catcher.

PORTABLE

A convenient finger grip aids the process of picking up and carrying the GO! Big Die Catcher with ease.

2 WAYS TO STORE

Vertical Storage:

The built-in metal foot enables the GO! Big Die Catcher to stand vertically, conveniently stored next to the GO! Big cutter in its upright position when not in use. Internal magnets secure the lid to the base in this standing orientation.

Horizontal Storage:

Alternatively, the GO! Big Die Catcher seamlessly mates to the GO! Big platform, allowing it to be stored horizontally. This configuration is a great option when the GO! Big cutter is stored open.
