

# GO! BOLT™ EASY AS...

Congratulations on purchasing your new GO! Bolt™ Die Catcher. It's specially designed to work with the GO! Bolt Electric Cutter to easily catch your GO! Dies as the run through the cutter. Here are some helpful hints and steps to get the most out of your GO! fabric cutting system.

learn more at [accuquilt.com/gobolt](https://accuquilt.com/gobolt)

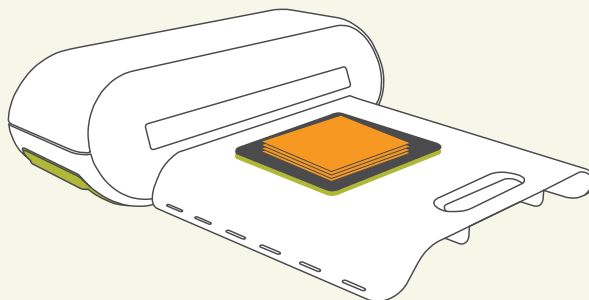

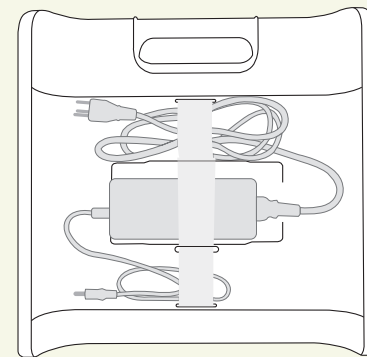

## 1. Setup.

Place the Die Catcher next to your GO! Bolt cutter with the handle facing away from the cutter. Enhance your cutting experience by adding a Die Catcher to the front, back, or both sides of your cutter for added convenience and efficiency.

*Tip: For optimal results when using GO! Strip Cutter dies, we recommend using two Die Catchers.*

## 2. Store.

When not in use, flip the Die Catcher over to reveal a built-in storage area. Neatly place the power adapter and cords in the designated compartments underneath. This clever design keeps your workspace tidy and your accessories protected.

## 3. Done!

You're all set! Enjoy the **accuracy**, **portability**, and **efficiency** of your GO! Bolt Electric Fabric Cutter with the added convenience of your Die Catcher.

**Happy Cutting!**

## COMPATIBLE

GO! Bolt Die Catcher works with most GO! die sizes 10" wide or smaller, including GO! Strip Cutter dies. It provides support for dies, even when extended beyond the edge of the Die Catcher.

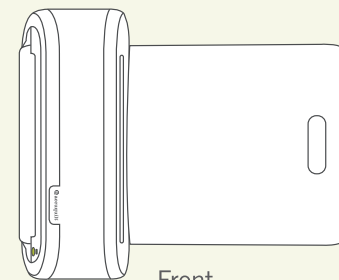

## PORTABLE & STACKABLE

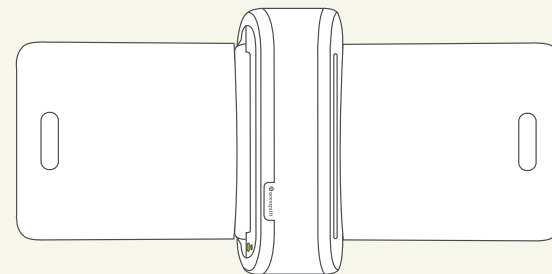

Designed with built-in handles for easy storage and transport, these stable platforms are essential for every GO! Bolt user.
